VIOLENCE FOLLOWS ATTEMPT TO OPEN TROLLEY TRAFFIC IN CINCINNATI.

# ARBITRATION BOARD DEMANDED

Traction Company Must Settle the Differences Between Themselves of Franchise Forfeiture—Several Persons Injured.

Western Newspaper Union News Service. Cincinnati.—The employes of the Cincinnati Traction Co. went out on strike Friday night. The street car system was completely tied up and no cars were run from Saturday afternoon until Monday. Cincinnatians living on the hill tops and in the suburbs were compelled to walk.

Anto trucks, busses and all kinds of vehicles were pressed into service, but were unable to handle the thousands of people who desired to ride.

The Traction Co. made efforts to get cars going but felt compelled because of demonstrations and interference by crowds to return the cars to the barns.

President Schoepf announced that another effort will be made to get the cars started. It is certain that there will be opposition to this move in some form or another.

The organizer of the local union has announced to the men his desire that no vlolence shall be used, but that peaceful means shall prevail to prevent the cars going out.

A number of conductors and motormen from other cities arrived here to take the places of the strikers. It is regarded as almost certain that if the cars are not going to-day that an application will be made to the Federal Courts for the appointment of a receiver to take charge of the property and conduct it for the benefit of the

# Mayor and Schoepf Confer.

The Mayor and President Schoepf held a conference at City Hall. There is a story that all was not as pleasant as it might have been between the two gentlemen.

The Mayor claims that there is plenty of police protection for the cars to run while Mr. Schoepf claims he can not operate his property because of the act of violence.

The traction officials were in their offices all day, during which time they considered every phase of the situation, including that of applying to the court for protection, a plan which at this writing appears to be certain of consummation.

# Two Cars Are Burned.

The two street cars which had been sent out on the John street line in charge of strikebreakers and deserted at Westwood avenue and Showell, were set afire and one of them practically ruined. The other one was badly damaged by the flames.

The blaze was discovered by Officers Hays and Schaefer, of the Ninth district, who had just left the station some one had pulled the alarm. The fire company and the officers arrived on the scene almost simultaneously.

# May Apply For a Receiver.

The application for the appointment of a receiver for the Cincinnati Traction Co. is the alternative that the company must face unless it comes to time in treating with its employes.

DEMOCRATIC MEASURE ADOPTED BY HOUSE BY VOTE OF 281 TO 139.

GOES AT ONCE TO SENATE

Flood of Protests Awaits Its Appearance in Upper Body of Congress - Republicans Will Make Fight for Public Hearing.

Washington, May 10.-The Underwood tariff bill, proclaimed by the Democratic party as the answer to its platform pledge to reduce the tariff downward, was passed by the house Thursday. The vote was 281 to 139, five Democrats voting against the bil and two Republicans voting for it.

Floods of protest from manufacturer, merchant, producer and foreign nations await the bill when it makes its appearance before the senate. The bill will be started upon its stormy way at once. Republican senators will open the fight by demanding public hearings. This will be defeated, but it is the purpose of the Democrats to give full hearings in committee to

all classes of objectors. The tariff bill made record time through the house, but little more than two weeks having passed since it came from the ways and means committee. All amendments except those proposed by the committee were defeated. With the exception of Broussard of Louisiana, no Democratic member of the house proposed

changes in the bill. Republican leaders sought to make political capital for their party just before the final passage of the bill through the house in an effort to bring the Democrats to a record vote on the creation of a tariff commission.

An amendment providing for such a commission was ruled out of order by Speaker Clark. Mr. Mann appealed from the ruling and the speaker was sustained. 274 to 143. Each of the suits was for an amount too small to allow an appeal to the circuit court, and it was reported that some 1,600 similar suits would be brought in the quarterly court. The railroad company instituted proceedings seeking to enjoin the judge of the quarterly court from proceeding further in the trial of the cases, alieging among other things that the plaintiffs in question had no cause of action against the railroad company, and that the plaintiffs and their attorneys had entered into a conspiracy to file their suits in the quarterly court for ar amount not allowing of an appeal, and that unless prevented they would institute many other similar suits. The petition of the railroad company sought to have the circuit court take furisdiction of the actions and try them out to ascertain if a cause for action really existed.

PREDICTION OF WHITE HOUSE LAMB AMONG CAPITOL HILL LIONS REVERSED.

## EASY PROGRESS FOR POLICIES

prised at Way President Wins His Way-Will Get Such Laws as He Wants.

By GEORGE CLINTON. Washington.—Members of the Democratic party in congress today say, in the way of what might be called an admission, that when Woodrow Wiison was elected president the general Democratic view of it seemed to be that after March 4 it would be a case of a White House lamb among Capitol Hill lions. Today some of the Democrats say that it seems to be a case of Capitol Hill lambs and a White House lion.

Democratic senators and representatives told President Wilson some time ago that they thought it likely he would win his tariff fight. Today they are telling him that he has won it. Consistently with the original lion and lamb theory the Democrats thought at the first that the leaders in congress would have their own way in tariff legislation. Now they say the Kentucky Wool Growers' associal that they made a mistake and that it Wilson exactly what he has asked for

in the way of tariff reform. It is difficult to determine which is the more surprised in Washington today the coservative Democrats or the Republicans because of the comparatively fairly easy way in which Mr. Wilson seems to be making progress with his policies. The Democrats now not only say that his tariff bill will go through the senate virtually as he has approved it, but that the fair promise today is that he will get currency legislation and anti-trust legislation in accordance with the views which he will express as to what form such legislation shall take.

Responsibility is Wilson's. The tariff measure after it becomes a law possibly may work the ruin which some gentlemen predict for it, but whether it works evil or good it will be Woodrow Wilson's legislation. A good many of the formerly reluctant Democrats in the senate while they do not appear to have become eager in their desire to support the president, seemingly have made up their minds to support him, and voting support from all his party in the upper house is what the president needs because the Democratic majority there

Some of the Democratic senators who have leaned toward protection have, as their progressive brethern put it, been brought into line by presidential persuasion accompanied by a showing of firmness. For a good many weeks some of the upper house men urged that certain schedules as prepared by Mr. Underwood and his committee on ways and means were of a kind to bring disaster to some of the home industries. It is understood that Senator La Follette may talk for a day in behalf of his ideas of the tariff, and it is rumored that several other progressive Republicans and some Democrats intend to do the same thing. In the house it is sharply a case of the majority rule. What the leaders of the dominant party want to have done is done and the program that they fix for general debate and for debate under the five-minute rule is adhered to. In the senate no majority rules against the debating wish of the in-

It is expected that this bill, freighted with so many joys or woes according to the way in which it is looked at, will be passed by the house at the time agreed upon and that it will be passed by a great vote.

It has been put cynically within a day or two that two good old traveling companions reached Washington together, the tariff and summer weather. The latter for a few hours now has quit the company of the tariff, but the two companions will get together once more shortly and the capital and the capitol will present again the scenes of recent summers. It is the same old tariff drama over again in the same setting and with a good many new faces among the minor

A good many of the members of congress say with a perfect abandon of frankness that it is just as well the dominant ones limited general debate to a few days and will limit debate under the five-minute rule to only a few days more. Even such tariff patriots as Mr. Payne and Mr. Fordney it is said are glad in their hearts that the thing as far as the house is concerned is to be over quickly.

No Friction There. While some persons who seem always to be looking for a row have found on several occasions symptoms of friction between President Wilson and one or two of his cabinet officers nothing really has developed yet in the way of trouble which any political opponent of the president could lay his finger on and say "here is where they come to the

parting of the ways." These seemingly are the plain facts in the case thus far, and men of all parties here say that as far as peace and concord in the cabinet are concerned they are there to sit at the family council table twice a week and probably to be present whenever the official ones get together on other occasions in between.

There seemingly, however, has been a slight difference of opinion on the face of things between Attorney General McReynolds and the president. Note that it is said on the face of things, but nothing has happened to show that Mr. Wilson up to date does not agree with his cabinet officer. The seeming difference lies in the fact that Mr. Wilson on one or two occasions has expressed views which seem to be counter to those expressed by Mr. McReynolds in a specific case.

The Attorney General has said that the case of the American Telephone and Telegraph company, charged with being a monopoly in restraint of trade, or something much like that. should be referred to the interstate commerce commission instead of going the way of prosecution. Does this mean that there is a radical difference of opinion on trust matters between President Wilson and his attorney general? It seems to be a case in which Mr. McReynolds believes that regulation rather than prosecution should be used in dealing with certain kinds of alleged trust cases. There are some people who hold that the telephone is a natural monopoly, and that therefore it should be subject to regulation rather than to court procedure. .

Believes in Competition.

In an article which Mr. Wilson wrote for a magazine he stood against, seemingly, at least, that for which his victory and his backbone has proved cabinet officer has just chosen to endorse. The president apparently believes in a return to competitive conditions, but whether his views on competition extend to concerns like telephone companies is not yet to be decided. Mother Goose Party.

Masquerade and fancy dress parties are always delightful, but of all the pleasant gatherings which I have attended the Mother Goose party takes the lead. Invitations to the effect that Mother Goose will be pleased tied at the top with various colored to welcome her goslings at the res- ribbons. They were to carry the faidence of whoever gives the entertainment on such an evening, are sent out fully two weeks in advance. The request to come in costume representing some one of the characters found in "Mother Goose" can be written on a small card and inclosed in the envelope with the invitations. These invitations can be made very pretty if one can paint, by having little water color or pen and ink sketches on them-such as little "Jack Horner" or the "Three Blind Mice" pursued by the "Farmer's Wife," with her "Carving Knife."

You maye be sure after these notes

have been sent out that there will be a ripple of excitement among the young people, and Mother Goose melodies will be at a premium—those with colored illustrations in particular. Great ingenuity can be exercised in getting up the costumes. At last the eventful night arrives and let us station ourselves in the hall and watch the guests as they come in. Most of the girls came without escorts, for all were determined to keep their identity a secret from brothers and sweethearts. "Mother Goose," the hostess, stands in the front parlor and is soon welcoming a motley throng. "Old King Cole" was closely followed by "The Fiddlers Three." "Little Red Riding Hood" was charming in her scarlet cape and carried a little basket filled with candy instead of the eggs and butter. The "Queen of Hearts" was radiant in a gorgeous costume. "Rain, Rain, Stay Away" was represented by a pretty blond, who carried an immense red umbrella. "Little Boy Blue" dashed into the room, blowing his horn, carrying an imeuse sheep of cotton. Two girls exactly the same height came as twin "Bo Peeps," carrying gilded crooks and fans with the picture of a sheep on one side with "I'm Little Po Peep," etc., on the other. "Daffy Down Dilly" was one of the best characters represented. "Jack and Jill" went hand in hand to get the "pail of water." "Jack Horner" sat in the proverbial corner and pulled out "plums" from a gigantic "pie." "Humpty" Dumpty did not look any the worse for the "great fall." "Mary, Mary, Quite Contrary" proved herself most agreeable and "Taffy, the Weishman," was one of the most popular characters in spite of his propensity for stealing.

When all the guests had arrived Mother Goose, with Old King Cole, opened the grand march and the music played merrily. A piano will do for the dancing, but the addition of a violin is a great improvement. Much merriment was occasioned when the masks were removed before the refreshments were served. While the young people are home for the summer vacation some one may give a party like the one described, and I am sure it will be successful. Of course, the masking is not essential, but adds a little spice to the enjoyment. The refreshments need not be elaborate, but a large bowl of lemonade should be conveniently placed where it will be easy of access to all.

When all had arrived and were seated at the tables the hostess was very particular to personally introduce each partner, if unacquainted, which made everyone feel more comfortable. Then the bell rang and playing began .-- Four games were played and the losers were the ones to move, going to a table for favors. These they gave to the winners at the other tables, who were taken to the table of the losers, and thus they met an entirely new set of players. There was no counting of scores-simply the best three hands winning out of four. There were ten sets of favors. After: five sets of favors had been used refreshments were served, then playing was resumed until all the favors had been used. At the last each loser brought an extra favor for her favored partner and herself, which called forth much merriment, as they were large paper sacks blown out and vors home in, and they were needed. It cortainly was a very jolly party, and the idea is adaptable to all card parties where the hostess desires something out of the ordinary. The favors may be as elaborate as the purse will permit. The ones at the party described consisted of bonbons in fancy boxes, imported chocolate, salted nuts in dainty receptacles, paper aprons, neck ruffs of flowers, fans, parasols, paper hats, post cards, etc.

# LEGAL DECISION

OF GREAT IMPORTANCE TO MIN-ERS OPERATORS RENDERED BY JUDGE.

Miners Can Sue for Time Lost on Account of Failure to Furnish Cars To Operators.

Western Newspaper Union News Service. Greenville, Ky.-Judge W. P. Sandidge has denied the petition of the Illinois Central Railroad Co., in which it sought to enjoin the quarterly court from trying a number of suits brought by coal miners against the railroad company, at the same time sustaining the petition of the latter.

Some weeks ago 43 miners filed suits in the Muhienberg quarterly court against the Illinois Central, seeking to recover damages for time lost, because, as alleged, the railroad company had failed to furnish to the coal operators, who were forced on that account to shut down their mines. Each of the suits was for an amount too small to allow an appeal to the circuit court, and it was reported that some 1,600 similar suits would be brought in the quarterly court. The railroad company instituted proceedings seeking to enjoin the judge of the quarterly court from proceeding further in the trial of the cases, alleging among other things that the plaintiffs in question had no cause of action against the railroad company, and that the plaintiffs and their attorneys had entered into a conspiracy to file their suits in the quarterly court for ar amount not allowing of an appeal, and that unless prevented they would institute many other similar suits. The petition of the railroad company sought to have the circuit court take furisdiction of the actions and try them out to ascertain if a cause for action really existed.

The injured men were sent sailing to the earth without a chance of saving themselves or breaking their fall; a desire for a drink of water and a lucky grab at a rope saved the other two. Louis J. Wright, of 2913 Garfield avenue, was the most seriously injured. Besides two fractured ankles, a deep cut on the head, several broken ribs and a crushed foot, he is believed to have received internal injuries. D. S. McKinney, of New Albany, also was badly hnrt. ## WARRANTS BEAR INTEREST.

Frankfort, Ky.-In an elaborate opinion handed down by Judge Shackelford Miller, member of the Court of Appeals, from Louisville, to which there was no dissent, the decision of the Franklin Circuit Court is affirmed in requiring State Treasurer Thomas Rhea to stamp as interest bearing five warrants for \$5,000 each, issued by State Auditor H. M. Bosworth, under an appropriation of \$30,000 made by the General Assembly in 1912 to pay off outstanding debts of the State Fair. The opinion is considered broad enough to settle the points involved in the suit of the State University to compel the Auditor to issue and the Treasurer to stamp as interest-bearing warrants aggregating \$50,000 for the benefit of the State experiment stawarrants issued under appropriations for the State Normal School, the State University and various departments and institutions, which were held up for the same reason advanced by the Treasurer in the State Fair case, that the debt of the State already exceeds the constitutional limitation of \$500.-

000. The court held that these appropriations are not debts within the meaning of Section 49 of the Constitution, and that they must be stamped as interest bearing if there is not actually money enough in the treasury

to pay them.

## WOOL GROWERS CONFER.

Louisville, Ky.—Representatives of the Kentucky Wool Growers' association held a conference at the Willard for the 1913 crop of wool pooled by growers throughout the state. Among the early arrivals was Ben Watson, of Webster county, president of the organization. Silas Stevens, of Ohio said that representatives of the association meet annually at about this season with a view to arranging with buyers for the purchase of the pooled wool. The price paid last year, he said, ranged from 18 to 35 cents, and he expressed the opinion that conditions governing the price of wool this year are not dissimilar from those of last year. Under normal conditions, about 3,000,000 pounds of wool are grown annually in Kentucky, President Watson said. Kentucky-grown wool ranks high in point of grade, according to Mr. Watson, and finds a ready market.

PREDICTION OF WHITE HOUSE LAMB AMONG CAPITOL HILL LIONS REVERSED.

Washington .-- Members of the Democratic party in congress today say, tion, and to compel the stamping of in the way of what might be called an admission, that when Woodrow Wilson was elected president the general Democratic view of it seemed to be that after March 4 it would be a case of a White House lamb among Capitol Hill lions. Today some of the Democrats say that it seems to be a case of Capitol Hill lambs and a White House lion.

Democratic senators and represen-

tatives told President Wilson some time ago that they thought it likely he would win his tariff fight. Today they are telling him that he has won it. Consistently with the original lion and lamb theory the Democrats thought at the first that the leaders in congress would have their own way in tariff legislation. Now they say that they made a mistake and that it is virtually an assured thing that the hotel with buyers relative to the price Democratic senators will get together, preserve party harmony and give Mr. Wilson exactly what he has asked for

"Mother Goose," the hostess, stands in the front parlor and is soon welcoming a motley throng. "Old King Cole" was closely followed by "The Fiddlers Three." "Little Red Riding Hood" was charming in her scarlet cape and carried a little basket filled with candy instead of the eggs and butter. The "Queen of Hearts" was radiant in a gorgeous costume. "Rain, Rain, Stay Away" was represented by a pretty blond, who carried an immense red umbrella. "Little Boy Blue" dashed into the room, blowing his horn, carrying an imense sheep of cotton. Two girls exactly the same height came as twin "Bo Peeps," carrying gilded crooks and fans with the picture of a sheep on one side with "I'm Little Po Peep," etc., on the other. "Daffy Down Dilly' was one of the best characters represented. "Jack and Jill" went hand in hand to get the "pail of water." "Jack Horner" sat in the proverbial corner and pulled out "plums" from a gigantic "pie." "Humpty" Dumpty did not look any the worse for the "great fall." "Mary, Mary, Quite Contrary" proved herself most agreeable and "Taffy, the Welshman," was one of the most popular characters in spite

When all the guests had arrived Mother Goose, with Old King Cole, opened the grand march and the music played merrily. A piano will do for the dancing, but the addition of a violin is a great improvement. Much merriment was occasioned when the masks were removed before the refreshments were served. While the young people are home for the summer vacation some one may give a party like the one described, and I am sure it will be successful. Of course, the masking is not essential, but adds a little spice to the enjoyment. The refreshments need not be elaborate, but a large bowl of lemonade should be conveniently placed where it will be easy of access to all.

A Novel Card Party.

This pretty card party was conducted like a cotillon and was a great success. It was given for forty guests, and the tables were scattered through- nia. 9. Mari (Mary)+gold=mariout the large rooms of a spacious gold. 10. Butter+cup=buttercup. country house. In the first place each

guest found her place at table with three others by means of a souvenir name card.

When all had arrived and were seated at the tables the hostess was very particular to personally introduce each partner, if unacquainted, which made everyone feel more comfortable.; Then the bell rang and playing began .-- Four games were played and the losers were the ones to move, going to a table for favors. These they, gave to the winners at the other tables, who were taken to the table of the losers, and thus they met an entirely new set of players. There was no counting of scores-simply the best three hands winning out of four. There were ten sets of favors. After five sets of favors had been used refreshments were served, then playing was resumed until all the favors had been used. At the last each loser brought an extra favor for her favored partner and herself, which called forth much merriment, as they were large paper sacks blown out and tied at the top with various colored ribbons. They were to carry the favors home in, and they were needed: It certainly was a very jolly party; and the idea is adaptable to all card parties where the hostess desires something out of the ordinary. The favors may be as elaborate as the purse will permit. The ones at the party described consisted of bonbons in fancy boxes, imported chocolate, salted nuts in dainty receptacles, paparasols, paper hats, post cards, etc.

Portraying Nature With Bible Verses.

Very recently a correspondent asked me for some Bible scheme to interest children, to be used as part of a Sunday school program. Seems to me the following arranged by Harriette Wilbur would be acceptable. Learning the verses as given will teach the children about the Bible and how much it contains about the flowers that we have today. This could be used on "Children's day," which is observed in so many churches early in

Spectacle of "Red Widow" and Her Victims in Streets of Paris Being Opposed By Many as Conducive to Crime.

Paris.—The death of criminals upon a guillotine set up in the street

It is therefore probable that when the "Red Widow," as the French call the guillotine, the gory spectacle may the case the motor bandits would be

inspire awe. The would-be assassin is supposed to see the terrible end of fellows such as he and refrain from what I want it to be." committing the deed.

The reverse of the picture is said by many to be true. The hardened criminal usually meets his doom in a way that inspires other of his stamp with the notion that he is a real hero, for public beheadings furnish occasion for the exhibition of a certain kind of bravado which has a strong appeal to the desperado type. Senator de Chaumie, one of the leaders of the public beheading abolition movement, so says, adding that not only are such scenes disgusting beyond expression. but demoralizing in the extreme.

Beheadings now take place at sunrisc. The condemned man is kept in ignorance of the date of his death until he is awakened to have his final tollet made for the knife. Until that moment he has hopes of executive clemency, it being the invariable rule to ask the president as a last resort to use his prerogative and show mercy.

The scene usually is in some street near the prison in which the man is confined. The narrower and more the authorities desire as few of the rabble as possible to see the blade fall. Scores of police and a large number of troops, on foot and a-horse, keep the crowds back and only the officials, newspaper men and prison chaplain are grouped about the base of the guillotine.

When several persons are beheaded they are brought out of the prison one at a time, the last to die not seeing the others meet their fate. The criminal is tied to a sort of block which pivots in the middle; he is given a push, he falls horizontal and the triangular, blade descends. The head rolls into a basket on one side, the body is dumped into a similar but longer receptacle on the other. Then the carcass is carted away at a gallop while the headman's assistants wash the guillotine with huge sponges, which they wring out in pails of water.

They call this "making the wldow's toilet for her next husband."

Much of this sickening sight as possible is hidden from the public, which remains passive, or becomes demonstrative according as to whether the man is an ordinary criminal, or "popular" or much disliked. If hated cries of "A mort!" and "Death to the murderer!" are heard as the knife falls.

There may be a time when The little paper pot will be bottom- it is my duty to play rather than pray.

The test the Christian must apply to his pleasures is: do they recreate and restore the waste tissues of the body? Excess in athletics is not recreation. Young men have died from overstrain in running; girls have been ruined for life by excessive ropejumping. Many pleasures dissipate the powers of the body instead of recreating them.

2. The pleasure of the Christian should recreate mentally. The physical must not be developed at the expense of the mental. Giantism must not supplant intellectualism. Mind is greater than body, as Gladstone and Bismarck are greater than John L. Sullivan or James Jeffries. The Christian must ask himself, therefore. "What effect do my pleasures and amusements have upon my mind, my thought, my thinking? Do they build up, ennoble, purify, sanctify, or do they debase, defoul, bésmirch, debauch? Scores of police and a large number of troops, on foot and a-horse, keep the crowds back and only the officials, newspaper men, and prison chaplain are grouped about the base of the guillotine.

When several persons are beheaded they are brought out of the prison one at a time, the last to die not seeing the others meet their fate. The criminal is tied to a sort of block which pivots in the middle; he is given a push, he falls horizontal and the triangular, blade descends. Writer in Universalist Leader Puts the Subject Before All Denominationalists.

There is a genuine desire, which is approaching the universal, in Christian churches of every name, for some form of unity, in which the forces of the Christian faith held in common, may be made effective. But the desire has in a large measure proved fruitless, because of the unwillingness on the part of any to sacrifice their cherished inheritance of denominational history, tradition, practices, dogama and autonomy.

This stubbornness of integrity has successfully withstood every assault and every appeal; and really, it is to the credit of those having convictions, to hold them sacredly, and yet because of this, the movement towards unity is stayed at this point.

And therefore it appears that goal so earnestly sought must be approached by another path; a path through which all may waik without surrender of self-respect, and yet with entire abandon to the spirit of

unity. It should be noted that whatever the detail of practical opposition to unity, really it comes back finally to pride of and loyalty to the denomination; that is, the one word which stands in the way of church unity today, is the word denomination; the word; regardless of its etymological meaning, which marks the boundaries of inclusiveness and exclusiveness, and forbids any union which is not absorption.

And yet no word so entirely misrepresents the spirit which' dwells within the church for it builds the wall which prevents that federation of forces which is already in the hearts of the great majority. The prevailing spirit recognizes that the Christian churches are already one in purpose and are kept apart by denominational barriers. How to preserve the good in the denominational organization, to maintain church seif-respect, to encourage specific loyalty, to conserve every existing force, and yet to bring them into a working whole, is the problem.

And this problem, we believe, finds its solution in a single word. Every sect recognizes that it is but one A salesgirl in a local department member of the Christian church, it made actual and practical and the way to real unity is open for use, for we have but to strike out from ecclesiasticai literature the word "denomination," and substitute in its place the word "department."

Temperance People Highly Elated Over Events Recently Enacted 'at Nation's Capital.

The two great principles of total abstinence and prohibition have lately received wonderful impetus—the first in the attitude of the administration at Washington, the second in the passage by the last congress of the bill regulating interstate shipment of liquor.

When a few days after March 4 the morning papers reported that this was to be a "white ribbon administration" there was great rejoicing among the temperance forces, and from National W. C. T. U. headquarters the following message was promptly sent over the wires:

Mrs. Woodrow Wilson, the White House, Washington, D. C.: We are inexpressibly glad for the noble decision made by the Wilson administration in regard to the non-use of wines and liquors. The beneficent example, safe for all to follow, wiil bless numberless lives and brighten countiess homes. Protest That Counts.

It is a great thing for the voter to make his protest against the liquor traffic in prayer-meeting or by his manner of life, but if he would really tell the government, as well as the Lord and the people, that he wants the saloon closed, there is but one method by which he can be recognized; but just one law under which his opinion can declare itself, and his conviction make itself felt, and affected with lung worms because of that law and method are fulfilled the danger of injuring the lungs or air when he drops into a box a ballot that calls for prohibition.—Frances E. # Best Strike.

Many and urgent are the questions that the working men and women of today must help to decide. But whatever may be said of methods in general and of special methods—as strikes-in particular, as a temperance woman I am confident that the best strike is to strike against the saloon and then to strike against all politicians and parties that do wrong to the workingman. Those are the two strikes that will pay.—Frances D. Willard.

CULTIVATION vs. NEGLECT

(Continued from last week)

Some of the causes leading to the degradation of people in the tenement district, is the crowding together of many small houses with no proper conveniences for the tenants. The tendency of such crowding is to lower the moral tone. However strong in virtue a people may be under proper conditions, huddling them together will sap the moral fibre.

Another cause of moral degeneracy, is allowing over-crowding tenement houses. Sometimes two or three families will occupy one small house. This condition is brought about by poverty and by the total lack of proper appreciation of humanity by grasping landlords who do not care for the propriety of the thing, but who this literature will be greatly aug. wind is blowing. What you need sugar. Yet it was to get rid of the payment want every copper a property will produce. Those who can not help it and those who do not care, occupy such premises.

Sometimes in such districts are located those places where men and women, bereft of all decency, are wont to congregate. These houses more than any other things, are the causes of much of the humiliation and shame of the human family, and when men and women are humiliated and their high spirits are broken, they stoop to crime.

Vice produces vice and when virtue is surrounded by all that is vicious, it becomes contaminated and falls from its high estate.

It is the duty of the city to keep a strict surveilance over the morals and conditions affecting the morals of the people. Proper sanitary conditions must be enforced and proper moral living must be required. Children are entitled to a protectorate and if their parents from poverty are forced to live in the abandoned portions of the city, surrounded by all that is vicious, the children will be vicious, though the maturity of mind of the parents may keep them in the paths of honor. But we should hold in memory these very familiar words:

"Vice is a monster of so frightful a mein As to be hated needs but to be seen, But seen too oft, familiar with his face, We first endure, then pity, then embrace.

There should be a strict law regulating tenements, requiring proper accommodations for the tenants. There should be a rigid police supervision over such parts of the city.

Houses of questionable character should be closed and the inmates driven from the city There is no such thing as necessary evil."

Put a good church building in such quarters, put a preacher in charge who is willing to work and in a months time the whole moral tone of the red light district will be changed. Dollars so invested will yield many hundreds in the increased value of property and will yield a thousandfold in character and good citizenship, in sponsible positions of the business world. # The New Dormitory

On Friday evening we had the pleasure of going through the annex to the girls dormitory at the E. K. S. N. and it is indeed "a thing of beauty" and should be "a joy forever." Every modern convenience and equipment is there and everything which could add to the comfort and well being of the students has been considered. The building is perfectly lighted, heated and ventilated, each room has two iron beds, two closets and is neatly furnished. Postoffice, bathrooms, an elevator and a beautifully appointed dining room completes the plan and makes it one of the most up-to-date buildings in this section of the country. We congratulate If the stylish woman could see Dr. Crabbe and the Board of Re-

# Baccalaureate Sermon

The Baccalaureate sermon delivered by Dr. R. H. Crossfield, of Transylvania University, on Sunday morning at the Presbyterian Church was a most masterly effort. Just thirteen years ago he was called upon by Madison Institute to perform a like office, and it is a high tribute to his ability as a speaker that he should again be chosen.

Dr. Crossfield is a deep thinker and presents his subject in terse,

forcible style.

His theme, "The Duty of The Hour," carried with it a divine message and one which will linger in the minds of his hearers, Zaring was unaware of his mother's plans both old and young. He dwelt at length on the magnitude of our indebtedness to God, in literature, science and art; on the fact that every gift carries with it an tried it once and it didn't work. Mont- diate family had gathered to wish him obligation and of our duty to repay in some measure the Giver of all gifts, by noble living: by letting our light shine in dark places and by "filling our lips with a message from on High." A beautiful feature of the exercises were the choruses under the direction of Miss Thompson.

To Strike at Niagara.

agara with the king's new provincial posts: Colonel William Johnson, the advancing lines. cool-headed trader and borderer, who had lived and thriven so long in the had their strength, should lead a levy from New England, New York and New Jersey, to an attack upon Crown Lieutenant Colonel Monckton, of the fight; but where was the use? king's regulars, must take a similar force against Beausejour in Acadia, while General Braddock struck straight into the western wilderness to take Duquesne.

'Twere best to be prompt in every part of the hazardous business, and Braddock turned from the conference to push his own expedition forward at once. "After taking Fort Duquesne," he said to Franklin, "I am to proceed to Niagara; and after having taken that, to Frontenac, if the season wiii allow time; and I suppose it will, for Duquesne can hardly detain me above three or four days; and then I can see nothing that can obstruct my march to Niagara."

The Sagacious Franklin.

"To be sure, sir," quietiy replied the sagacious Franklin; "if you arrive well before Duquesne with these fine troops, so well provided with artiliery, the fort . . . can probably make in such a place how the battle fared? but a short resistance.'

But there was the trouble. 'Twould have been better, no doubt, had a route through Pennsylvania been chosen, where cultivated farms already stretched weil into the west, with their own roads and grain and cattle and wagons to serve an army with; but the Virginia route had been selected (by intrigue of gentiemen interested in the Ohio company, it was hinted), and must needs be made the

There was there, at the least, the rough track Washington's men had cut to the Great Meadows. This must be widened and ieveled for an army with its cumbrous train of artiliery, and its endless procession of wagons laden with baggage and provisions. To take two thousand men through the dense forests with ail the military trappings and supplies of a European army would be to put, it might be, four miles of its rough trail between van and rear of the struggling line. and it would be a clumsy enemy, as fighting went in the woods, who could not cut such a force into pieces-"like thread," as Frankiin said.

The Advance Begins. The thing was to be attempted, nevertheless, with stubborn British resolution. It was the 19th of May before all the forces intended for the march were finally collected at Fort Cumberiand, twenty-two hundred men in aii-fourteen hundred regulars, now the recruits were in; nearly five hundred Virginians, horse and foot; two Independent companies from New York; and a smail force of sailors held the Indians to their easy work. from the transports to rig tackle for the ordnance when there was need on the rough way. And it was the 10th of June when the advance began, straight into that-"realm of forests ancient as the world" that lay without limit upon ail the western ways."

Braddock a Mischief Breeder. It was a thing of infinite difficulty to get that lumbering train through the tangled wilderness, and it kept the temper of the truculent Braddock very hot to see how it piayed havoc lain stricken with a fever in Dunbar's with every principle and practice of campaigning he had ever heard of. He charged the colonists with an utter want alike of honor and of honesty to have kept him so long awaiting the transportation and supplies they had promised, and to have done so little to end with, and so drew Washington into "frequent disputes, maintained with warmth on both sides"; but the difficulties of the march presently wrought a certain forest change upon him, and disposed him to take counsel of his young Virginian aide—the only man in all his company who could speak out of knowledge in that wild country.

On the 19th, at Washington's advice, he took twelve hundred men and pressed forward with a lightened train to a quicker advance, leaving Coionel Dunbar to bring up the rest of the troops with the baggage. Even this lightened force halted "to level every mole-hill, and to erect bridges over every brook," as Washington chafed to see, and "were four days in getting twelve miles"; but the pace was better than before, and brought them at last almost to their destina-

> Braddock Will Not Listen. Washington besought General Braddock to scatter his men too, and meet the enemy under cover as they came, but he would not listen. They must stand in ranks, as they were bidden, and take the fire of their hidden foes like men, without breach of discipline. When they would have broken in spite of him, in their panic at being siaughtered there in the open glade without sight of the enemy, Braddock beat them back with his sword, and bitteriy cursed them for cowards.

> He would have kept the Virginians, too, back from the covert if he could when he saw them seek to close with the attacking party in true forest fashion. As it was, they were as often shot down by the terror-stricken regulars behind them as by their right foes in front. They alone made any head in the fight; but who could tell

> Redskins in Force. No one could count the enemy where they sprang from covert to covert. They were, in fact, near a thousand strong at the first meeting in the way-more than six hundred Indians, a motiey host gathered from far and near at the summons of the French, sevenscore Canadian rangers, seventy odd regulars from the fort, and thirty or forty French officers. come out of sheer eagerness to have a hand in the daring game. Contrecoeur could not spare more Frenchmen from his little garrison, his connections at the lakes being threatened, and he sorely straightened for men and stores. He was staking everything, as it was, upon this encounter on the way.

If the English should shake the savages off, as he deemed they would. he must no doubt withdraw as he could ere the lines of siege were closed about him. He never dreamed of such largess of good fortune as

came pouring in upon him. The English were not only checked, but beaten, They had never seen business like

this. 'Twas a pitiful, shameful slaughter-men shot like bears in a pen there where they cowered close in the scarlet ranks.

Their first blazing volley had sent the craven Canadians scampering back the way they had come; Beaujeu, who led the attack, was killed almost at the first onset; but the gallant youngsters who led the motley array wavered never an instant, and readily

Washington did all that furious energy and reckiess courage could to keep the order of battie his commander had so madiy chosen, to hold the regulars to their blind work and hearten the Virginians to stay the threatened rout, driving his horse everywhere into the thick of the murderous firing, and crying upon aii alike to keep to it steadily like men. A Charmed Life.

He could hardiy sit his cushioned saddie for weakness when the fight began; but when the blaze of the battie burst, his eagerness was suddenly like that of one possessed, and his immunity from harm like that of one charmed. Thrice a horse was shotunder him, many bullets cut his clothing, but he went without a wound. A like mad energy drove Braddock storming up and down the breaking lines, but he was mortally stricken at last, and Washington aione remained. to exercise such control as was possible when the lnevitable rout came.

the fatal bullet found him. Sixtythree out of the eighty-six officers of his force were killed or disabled; less than five hundred men out of ail the thirteen hundred who had but just now passed so galiantly through the ford remained unhurt; the deadly slaughter must have gone on to utter destruction.

Death of Braddock.

Retreat was inevitable — 'twas' blessed good fortune that it was still or break away. His plans, he compossible. When once it began it was plained, were "today approved, tomorbegan to multiply; and so striking a headlong, reckless, frenzied. The men ran wildly, blindly, as if hunted by demons whom no man might hope to resist—haunted by the frightful cries. maddened by the searching and secret fire of their foes, now coming hot upon their heels. Wounded comrades, military stores, baggage, their very arms, they left upon the ground, abandoned. Far into the night they

on toward the settlements. Washington and the few officers and provincials who scorned the terror found the utmost difficulty in bringing off their stricken general, where he lay wishing to die. Upon the fourth day after the battle he died, loathing the sight of a redcoat, they said, and murmuring praises of "the blues," the once despised Virginians. They buried his body in the road, that the army wagons might pass over the place and obliterate every trace of a grave their savage enemies might rejoice to find and desecrate.

A Craven Commander. He had lived to reach Dunbar's camp, but not to see the end of the shameful rout. The terror mastered the rear guard, too. They destroyed their artillery, burned their wagons and stores, emptied their powder into the streams, and themselves broke into a disordered feverish retreat which was a mere flight, their cravan commander shamefully acquiescing. He would not even hold or raily them at Fort Cumberland, but went on, as if upon a hurried errand, all the way to Philadeiphia, leaving the fort, and all the frontier with it, "to be defended by invalids and a few Virginians."

"I acknowledge," cried Dinwiddle, "I was not brought up to arms; but I think common sense would have prevailed not to leave the frontier exposed after having opened a road over the mountains to the Ohio, by which the enemy can the more easily invade The whoie conduct of Coionel Dunbar seems to be monstrous." And so, indeed it was.

But the colonies at large had little time to think of it. Governor Shirley had gone against Niagara only to find the French ready for him at every point, now that they had read Braddock's papers, taken at Duquesne, and to come back again without doing anything. Beausejour had been taken in French off at Lake George when they with that, and left Crown Point unvania to be looked to and guarded. Three Years of French Success.

For three long years 'did the fortunes of the English settlements go steadily from danger to desperation, as the French and their savage ailies advanced from victory to victory. In William Henry. Commander succeeded commander among the English, only to add biunder to biunder, failure to failure.

And all the while it fell to Washington, Virginia's chief stay in her desperate troubie, to stand steadfastiy to the hopeless work of keeping three hundred and fifty miles of frontier with a few hundred men against prowling bands of savages, masters of the craft of swift and secret attack, dexterous at skulking," in a country mountainous and full of swamps and holiow ways covered with woods."

I would be a willing offering to save fury, and die by inches to save a people."

It was a comfort to know, at least, that he was trusted and believed in. The Burgesses had thanked him under the very stroke of Braddock's defeat, in terms which could not be doubted sincere. In the very thick of his deep the helpless people of the border, but It was impossible to hold the ground him word from Williamsburg, "Your a young comrade in arms, "is an example of fortitude in either danger or hardships, and by his easy, polite behavior has gained not only the regard but affection of both officers and sol-

. It was a test as of fire for a young colonel in his twenties.

But a single light lies upon the picture. Early in 1776, ere the summer's terrors had come upon the border, and while he could be spared, Washington took horse and made his way to Boston to see Governor Shirley, now acting as commander-in-chief in the colonies, and from him at first hand obtained settlement of that teasing question of rank that had already driven the young officer once from the service. He went very bravely bright in proper uniform of buff and blue, a white-and-scarlet cloak upon his shoulders, the sword at his side knotted with red and gold, his horse's fittings engraved with the Washington arms, and trimmed in the best style of the London saddiers. With him rode two aides in their uniforms, and two servants in their whiteand-scariet livery.

Curious folk who looked upon the celebrated young officer upon the road saw him fare upon his way with all the pride of an admirable Virginia gentleman, a handsome man, and an admirable horseman—a very galiant figure, no one could deny. Everywhere he was feted as he went; everywhere he showed himself the earnest, highstrung, achieving youth he was.

An Affair of the Heart. In New York he fell into a new ambush, from which he did not come off without a wound. His friend Beverly Robinson must needs have Miss Mary Philipse at his house there, a beauty and an heiress, and Washington came away from her with a sharp rigor at his heart. But he could not leave that desoiate frontier at nome unprotected to stay for a siege of a lady's heart; he had recovered from such wounds before, had before that left pleasure for duty; and in proper season, was back at his post, with papers from Shirley which left no doubt

At the beginning of great automobile race the mechanician of the Mercury. Stanton's machine, drops dead. Strange youth, Jesse Floyd, volunteers, and is accepted. In the rest during the twenty-four hour race Stanton meets a stranger, of the Carlisia who introduces herself. The Miss Carlisle, who introduces herself. The Mercury wins race. Stanton receives showers from Miss Carlisle, which he ignores. Stanton meets Miss Carlisle on a train. They alight to take walk, and train leaves. Stanton and Miss Carlisle follow in auto. Accident by which Stanton is hurt is mysterious. Floyd, at lunch with Stanton, telis of his boyhood. Stanton, ton again meets Miss Carlisle and they together. Stanton comes to track but makes race. They have accident. Floyd hurt, but not seriously. At dinner Floyd tells Stanton of his twin Jessica. Stanton becomes very ill and loses consciousness. On recovery, at his hotel Stanton receives invitation and vielts Jessica.

CHAPTER VII-(Continued).

"I am alone in the crowd, too," he rejoined. "If I thought Floyd would not object, or feel that I took advantage of his absence, I should ask if you would do me so much honor as to go to the theater with me, this evening."

Her gray eyes wldened, the color flushed through her transparent skin. Suddenly and vividiy Stanton was reminded of Floyd's face on the first night when he invited the mechanician to race with hlm for the season.

"You are asking me?" she doubted. "I would like to do so. But not if you think Floyd would refuse to let me, if he were here. He can't have much of an opinion of me."

I wish I might tell you what Jes thinks of you," she made grave answer. "I am quite sure that he would let me go with you, Mr. Stanton; you are very good and I thank you from

the hottom of my heart." The little oid Irishwoman in black silk opened the door for him, beaming and smlling. Amazed at himself. bewildered by a sense of having seen Floyd and yet not seen him, Stanton went down into the practical city

He spent two hours in selecting an irreproachable play and theater: a task of some delicacy in this his native town. After which, he ate a perfunctory dinner and went home to dress. Stanton, whose overbearing willfulness spared no one, whose rough tongue hurt his mechanician as often as they met, would no more have taken Floyd's sister to dine with him in a public restaurant without Floyd's permission, than he would have stolen his purse.

.It was a dazzling Jesslca whom he found waiting for him, at the appointed hour. Yet she was simply gowned in delicate gray, with a demure jace collar that came up to her round chin, and long lace sleeves. It was her vivid, expressive face; the bronze curis massed under the wide gray hat, the splendld glow and young vitailty of her, that made people look and look again. Stanton approved of her unreservedly; he had fixed masculine notions of what women should wear in public places.

On her left arm, over the transparent sleeve, she wore an antique silver bracelet fully four inches in breadth; a singular ornament, set with duli turquoise matrix. When Stanton assisted her to remove her cloak, at the theater, she suddenly winced.

"The bracelet-It caught my arm," she explained, before he could question. "It is too heavy, really, to

Except for the hours passed with Floyd, be had never experienced anything like this satisfying companionship.

The two women bowed without effusion, Valerle Carlisle scrutinizing Jessica with an acute attention that selzed every detail of her appearance. "Miss Floyd, have we not met?" she

puzzled. "Pardon, it seems so to me." "Prohably you have met my twin brother," Jessica suggested, gravely self-possessed. "He is much with Mr. Stanton."

There was a shock of antagonism in their meeting gaze, as there had been between Floyd and this girl when he had seen her in the railroad depot on the way to Loweil. Miss Carlisle turned to Stanton, enlight-

he amended. "Ah? But I am detaining you-I

merely wished to ask if you had quite recovered from your Illness. When you left us that night, I never imagined you would try to race next mornlng. And you should not have done so; it resulted in an accident."

He opened his llps to deny that his illness had caused the Mercury's mlshap, then paused. If he had not felt the average irritability of a strong man slck, would he have quarreled with Floyd and taken his car around the turn at such ruinous speed? He did not know.

"I am perfectly well, thank you," he answered, instead.

"Indeed, I am giad. Will you not come to see us soon-you owe us a dinner call, you know."

He did not echo her dellcately expectant smile, his dark face hard. "You must believe my appreciation of the dinner without that formality, Miss Cariisie. I start for Indiana in

a few days," he regretted. Her amber eyes also hardened, suddenly and strangely; she moved a step to retire, catching up her trailing iengths of satin and lace.

"As you wili, of course. Ah: we found out what car wins when you are taken from a race, Mr. Stanton, as at Loweli. And you judged wrong -it was not the Duplex, but the Atalanta. Good night."

Stanton looked after her, amazed, then abruptly turned his eyes to the frank, steadfast face of Jessica Fioyd. "Come out in the fresh alr." he requested. "That perfume she wears

He stopped short on the sidewalk. "You know-you think-" "I know only what Jes knows," she

declared. "But I think that Miss Carlisle is not good for your racing. Some people are naturally unlucky influences, perhaps."

Stanton shook his head, unbeguiled

by the pleasantry. "I understand what Floyd believes.

Floyd returned Stanton's call after fashion of his own, some days later. "There's a gentieman down-stairs to see you, sir," the beli-hoy brought information to the latter, one afternoon. "He won't come up because he says he can't leave his automobile, but he'd be glad if you'd come down, sir." Stanton looked at the card presented.

and rose with alacrity. His mechanician was in the hali, gazing across the wide windows at a low-swung, long-bonneted, dull-gray motorcar that stood by the curbstone; a car stripped as bare of every superfluous beiongings as a pugliist enterlng the ring. At the hiss of the descending elevator he turned to meet Stanton with his smile, of sun-shot

"Miss Floyd told you of my cali, the other day?" he queried.

"Yes, of course. I was sorry to be away; I had never thought of your hunting me up."

"You did not object to my taking her out? There was no way of asking you." This from the self-willed Stanton! Floyd's eyes glinted with an apprecia tion at once humorous and touched.

"Object? Why? You could take care of her," he countered.

"Fix the spark," bade Stanton, and went front to crank his motor. "We'il not get half a block without drawing every mounted policeman for ten miles," Floyd called, above the roar of the exhausts. "We ought to

PRESIDENT CONSULTS NOTED EX-PERT REGARDING REFORM IN THE CURRENCY.

GIVES SUBJECT CLOSE STUDY

Financial Reform Will Be Made a Party Measure and Put Through Much as the Chief Executive Wants It.

By GEORGE CLINTON.

Washington.-President Wilson has been conferring with some of the more noted of the financial experts of the country on the subject of currency reform. He has learned that most of the leaders of the Democracy in congress have come pretty close to an agreement as to the principles which should govern in trying to solve satisfactorily the currency reform problem. In his message, to congress on the subject it will be found that the president has definite ideas of his own on the financial subject, and that these thoughts of his will be molded with those of the party leaders and the ness the way you wanted, so they sent | finance experts into what Mr. Wilson thinks wlil be a proper measure to meet the requirements of the national

It seems to be taken for granted in Washington that the currency biii wiii cause more debate even than the tariff bill, for past experience has shown that in dealing with anything concerning finances there are about as many views as there are men in both houses of congress. Currency, however, wili be made a party measure and it will glance out the window, but accepting be put through the house under a rule the facts more amiably than could limiting debate, while over in the senate it must, like other bilis; run

President Studies Hard. It has taken the president some tlme to get into compact form his views on the currency problem. He underwent a course of study on the tariff to reinforce the knowledge he had accumulated on the subject slde with the currency he began studying the Panama canal tolls question, with a view to determining if his first thought on the matter that our coastwise vesseis should be admitted to the canal toll free, possibly might not be erroneous.

With the study of these two subjects he had to dig into the California-Japanese controversy, and it took aii of his time, and perhaps some of his strength, to arrive at conclusions. Washington people say that "burning party, and that they will be the mem- Only God can forgive and forget. But the midnight oil" when he was a boy for the purpose of acquiring party. knowledge has fortified Mr. Wilson to continue to burn the oil now that he

is president. Not iong ago on the free tolis question the president said some things which made it appear he held the view that this country owed a duty to its treaty obligations, or supposed obligations. Instantiy it was taken for granted that he agreed with Elihu Root and some other men not of his own party on the subject. A change of mind may come to him, for he has admitted that in this international affair, which may bring minor troubles in its wake, he has tried to keep an open mind until the last argument on each side has heen advanced and until he has been given time to think on

the subject deeply. From everything that Mr. Wilson says in his rather intimate talks with stands out prominently. He has been "at it" in hard study of pretty nearly everything which has come before his administration for action. His friends say that he knows when he has studied enough and that he aiso knows when worthy argument, pro and con, have been ended. The particularly "sharp" thing about this study and argument-hearing habit of Mr. Wiison is "sharp" seemingly to senators and representatives who are after patronage.

With the Office-Seekers.

In the Washington opinion, Mr. Wilson, in most of the office-seeking cases which he already has decided, has given decisions with comparatively iittle regard to the feelings of the men who were aligned on the side which did not appear to hlm to have great weight for its pleas for preference. Party men say that ln some lnstances the administration may have hurt itself temporarily in cases like this, but from what one can judge from what the president himself says about these things indirectly, there seems to be little fear in his mind that he is going to hurt himself when he says his final word on the form which iegisiation should take, or what should he done in cases like that of canai toils which occupies a somewhat higher plane than that on which mere legislation rests. Old Lines Are Broken.

There is not in congress today in either house one man of any party who does not claim that he is a progressive, or perhaps it were hetter to Newport worked out jointing a probsay progressive without the adjective iem. Here is what they said of it in forget our wrong acts and that Joseph "a" before it, hecause there is a new these dispatches on a previous occamost people do not recognize it. cation with their names attached, say oid.

today that the change that has come over the United States senate and house in the last ten years is amazing. Once there were in both' houses representatives of the Populist party who were called by men of their day radicais of an extreme type. Today in a good many things congressmen who personaily, or who through their fathers before them, denounced Populists have given adherence to a good many things which even the Populists in their day would have cailed "too radical for us."

All this shows simply the "progress of progressivism in the country" in the ranks of every party. There are still conservatives, but their conservatism is not as of the past and the conservatives of today say that their conservatism is really progresslvism.

Democratic Prediction. The other day Senator Henry T. Hollis of New Hampshire, Democrat, and the first member of his party from that state to appear in the United States senate for 56 years, delivered an address to young men in which he said this:

"If the Wilson administration is success along the lines lald down in the Democratic platform, the Democratic party will become the great

progressive party of the United States. The Buli Moose party will disappear and the Republican party will remain the great conservative party. If the truly progressive, it will become the conservative party, the Republican party will disappear and the Bull Moose organization will become the

great progressive party." Now, if any other Democratic senator, and perhaps if any senator of any party, had been asked his thoughts on the lines along which Senator Hollis spoke, he probably would have said the same thing, for Democrats, Republicans and Progressives are saying the same thing freely today in private conversation.

Some of the senators and representatives speak even more plainly and freely than did Senator Hoilis. They carry their thoughts along further, saying that the continuance of the Democratic party in power depends absoiuteiy upon whether or not the more conservative men in that party stand by the progressive orders of the peopie as given at the bailot box. Men who say this, go further and say that if any of the great Democratic policles fail because of conservative opposition in the ranks of that party or because of conservative Democratic and conservative Republican coalition, there will be another realignment of parties within the next three years

Lesson in War Scare.

It is the belief of those army and navy officers stationed in Washington and who are charged with the work of pianning in advance for any future wariike campaigns in which this hereafter wiii he more inclined to pay heed to the pleas for increasing the strength of some of the defense works of the national government. The men of the service say there seems to be an awakened desire today to set right some of the thlngs which ail political parties as represented in congress have had a hand in the past in making wrong.

Of course it was the threatened Caiifornia-Japan troubie which has aroused the party in power and in authority to make inquiry through their Benjamin, whom he had never seen. ieaders as to all things "which are We do not commend Joseph's method" Washington newspaper men, one thing | necessary within limits." Some time ago there was published in these dispatches the same story of Japan to do to us if war's occasion should come out of the trouble in California over the school question in that state as it affected the Japanese. 'in a few years the condition of things has not changed materially, but now that the second alarm has come it seems likely, and the army has been given some intimation in the premises, that the Democratic party, fuliy vested with power, wiii do something in a legislative way to keep the story of unpreparedness from being so dark when the next scare appears. LESSON FOR MAY 18

JOSEPH MEETS HIS BRETHREN.

LESSON TEXT-Gen. 42:3-17. GOLDEN TEXT—"Whatsoever a man soweth, that shall he also reap." Gal.

Joseph was thirty years of age when he reached his position of supreme authority, but we ought not to allow our selves to forget those thirteen years of humiliation; during which he was betrayed, sold into slavery and neglected by those whom he befriended. Yet those were days of fidelity in his service, of victory over fierce temptation, of enduring unjust imprisonment -a long period of patient waiting but a valuable period in that now at thirty years of age he comes to this position of power fully equipped with that Democratic party shail fail to remain knowledge of men, control of himself and falth in God as to be properly fitted for the burden of responsibility thrust upon him.

Did Not Forget.

1. The Brothers Need, vv. 3-5. The famine was not confined to Egypt, hut reached over to Canaan, where Jacob and his sons lived. The desperateness of the famine is indicated by Jacob's command to buy, "that we may live, and not die." But Jacob is tooold to travel, hence the brothers undertake the journey. Twenty-twoyears have passed since that experience when Joseph's brethren cast him into the plt. They have been years filed with wonderful experiences for Joseph. Now their attitude is changed; instead of being his tormentors they are suppliants at his feet. During these seven years of garnering Joseph had set up his own family and two sons were born, the names of whom were significant.

The possession of a child of his own would naturally quicken his inquiries as to his father's household, for he assumed that in the order of events his father must be dead.

II. A Brother's Memory, vv. 7-17. Joseph at once recognized his brothers, and that conservative Democrats and but treated them brusquely, demandconservative Republicans will get to- ing from whence they came and the gether in one party and that progres- purpose that brought them hither sive Democrats and progressive Re- (v. 7). Again (vv. 8, 9) the text republicans will get together in another minds us that Joseph remembered. bers of the present day Progressive Joseph is an Inspiration to us that though we may not be able to forget we can forgive. The question might be raised, "Why then did Joseph dissimulate?" The answer is threefoid: (1) Joseph desired to ascertain the characters of his brothers. Did they remember? Yes, for they replied that country may engage, that congress they were "twelve brethren." Ten were before him, one at home and "one is not." That their characters were not entirely changed is evidenced by their words, "We are true men" (v. 11), which of course was not the truth. (2) Joseph desired to know of his father and of their home life. The accusation that the brothers are spies called forth the statement that: the father, Jacob, is still alive. The third reason for this treatment deveioped out of these first two, viz., Joseph desired to reach his father and man, Jesus Christ, and Joseph polots

Guilty Consciences.

Joseph knew his brothers told the truth about their not being sples, but he also knew that they lied when they asserted themselves to be true menand that one brother "ls not." Hereis the lesson of mistaken estimates of one's self and that a man's true value is known and appreciated. Little did they realize, however, that their falsewhat the army and navy expected hood was being read as it was uttered and that the man before whom they were standing was this same hrother. Joseph affected not to believe any of their story and demanded proof (vv. 15, 16) of their assertions. # TWO OTHER MISILES FOUND

One Discovered in Railroad Station and Another in Sorting Room of Postoffice - Ticking Warns Employes of Danger. .

London, May 12.-Militant suffragettes exploded a bomb on the Cambridge university football field, setting the grandstand afire. The flames were extinguished before they made serious inroads. This was one of the few bombs planted by suffragettes which exploded. Mostly they were discovered before they went off or through miscalculation were rendered harmless. Two Other Bombs Found.

Two more of the now familiar bombs with which the militant suffragettes are attempting to scare the British parliament into giving the franchise

to women were discovered. One of them was found in the passengers' waiting-room at the busy Lime street raiiroad station in Liverpooi and the other in the sorting-room of the postoffice at Reading.

The fuse of the Liverpool bomb had been lighted by the perpetrator of the outrage, but had died out before it reached the gunpowder. The bomb consisted of a tin tobacco box filled with gunpowder and iron nuts, and the iong fuse was laid in the center.

Ticking Machine Warns Employes. The Reading machine was wrapped in a bulky parcel, to which the attention of the postoffice employes was attracted by the sound of ticking. The police were called in, and on examination found that the parcel contained an electric battery connected with explosives and accompanied by quantities of suffragette literature. The parcei was addressed to a municipal official of Reading now on his vacation. The police express the belief that it was timed to explode in his residence during his absence.
